Chains for Snow and Ice...

...Passenger Cars,
4x4 Vehicles,
Vans and Camper Vans

New!

RUD-compact easy 2go plus

Stationary fitting cable chain with an extremely good grip provided by the patented angle links - with automatic tensioning and integrated protection for the wheel rim

Major components of RUD chains are objects of German and European patents.
RUD was the first chain factory to gain the TÜV CERT certificate under DIN EN ISO 9001 for its company management system.

RUD as the official partner of the DSV – successful partnership on snow and ice!

From left to right:
Sven Fischer, Martina Ertl, Axel Teichmann, Uschi Disl, Martin Schmitt, Ronni Ackermann

The "winter equipment requirement" applies in Germany as from 2006. In practice, this means that when weather conditions require it, above all the tyre equipment must be fit for snow and ice. You're driving safely if you're using winter tyres and RUD snow chains – you're not only safe from wintry weather but also from heavy fines. This also applies to our neighbouring European countries.

Legal Requirements
Traffic sign 268 makes the use of snow chains mandatory when road conditions demand it. And that also applies to four wheel drive vehicles.
There are heavy fines for non-compliance.

Innovative chain products for snow and ice

CHAINS ATTRACTION

RUD snow chain system have a tradition that goes back over 100 years. We know exactly what a wide range of demands our chains need to comply with. Situations that demand everything there is from a chain call for the best possible material qualities.

The further development of our "SnowHow" has lead to a wide variety of innovative solutions which lead to a higher drive quality and to more safety for both people and vehicles.

Our premium brands are setting standards in terms of quality, personal advice, service and ingenious ease of handling.

Tradition in Leadership.

RUD-comfort Centrax

Most easy and simple to fit: RUD-Centrax chains Everything at a glance. No chain elements on the inside of the wheel.

RUD-matic chain

Especially useful for rear-wheel drives: The Matic fitting system with its pulley system.

RUD-compact cable chain

Simple and handy: Compact fitting. Just join up. Easy to tighten.

Everything from a one-stop-shop – all fitting systems

POWER, DYNAMIC, SECURITY... CHAINS FOR SNOW AND ICE

RUD-comfort

CENTRAX

Our top-of-the-line model – fascinatingly simple and fast to assemble

- No fittings on the inside of the tyre
- All fitting movements from the outside - everything under control at a glance
- No components on the inside of the tyre
- Fine link chain net
- Pulls itself on when the vehicle is driven away
- The chain adapts itself to the size of the wheel it's fitted on

NOW ALSO FOR SUV's!

RUD-matic

DISC

Our beauty queen – with perfect protection for light metal rims

- Comfort hoop chain for rapid fitting and removal even for narrow wheel arches
- High aesthetic quality
- A tough plastic ring (disc) protects light metal rims and trim strips
- Matches the appearance of the light metal rims

RUD-matic

KANTENSPUR

(KANTENSPUR V*)

Our dynamo – maximum grip in every wheel position

- Comfort hoop chain for rapid fitting and removal even for narrow wheel arches
- High-traction grip links
- Chain mesh can be reversed for longer life
- Pull-through metal loops for easy and secure positioning of the tensioning chain
- Fine link chain net
- * **KANTENSPUR V** version with extra strong chain elements for utmost wear

RUD-matic

CLASSIC (CLASSIC V*)

Rim protection **protect AR** is an available option

Our signature product – spring steel hoop ensure handy and quick fitting even for rear-wheel drives

- Comfort hoop chain for rapid fitting and removal even for narrow wheel arches
- Unique wedge-shaped link
- Chromium-manganese alloyed fine-grain steel
- Fine link chain net
